

Easy Chocolate Homemade Ice Cream

You have only THREE ingredients. I told you it was simple.

1 can sweetened condensed milk

1 8 oz. tub Cool Whip

1/2 gallon chocolate milk

Anyway, first mix the sweetened condensed milk with the cool whip and about half of the chocolate milk (or whatever will fit into your bowl).

Next, pour the mixture into your ice cream freezer, and fill the remaining chocolate milk to the fill line. (Ours fits 1/2 gallon just perfectly).

Follow your ice cream freezer directions to finish the ice cream. Ours involves adding ice and rock salt every now and then while the ice melts down, and stops on its own.
